

Why OrthoLite® is the Undisputed Industry Leader

OrthoLite® is the leading manufacturer and supplier of OEM and open-cell foam insole technologies for the world's leading footwear brands. As a vertically integrated U.S. company with facilities around the globe, we collaborate with our brand partners to create and produce custom insole formulations that deliver unrivaled comfort and performance. Here's how OrthoLite® innovation continues to set the standard:

Eco-Friendly

All OrthoLite® foams contain 5% recycled rubber, helping keep hundreds of tons of waste out of landfills each year.

Long-Term Cushioning

Unlike traditional foam, OrthoLite® foam compresses less than 5% over the lifetime of the product—so the cushioning, fit, comfort and performance never change.

Moisture Management

The unique open-cell structure of OrthoLite® foam creates a moisture management system, helping to move moisture away and provide a cooler, drier, healthier environment in any application.

High Level Breathability

OrthoLite® foam's open-cell PU technology is 95% to 100% breathable, allowing air to circulate in and around the foam, keeping the surrounding environment cooler.

Lightweight

OrthoLite® foams are extremely lightweight—enhancing performance with day-in, day-out airy comfort.

Washable

OrthoLite® foams are machine washable, coming out like new every time while maintaining all of the comfort and performance benefits after washing.

Antimicrobial

A patented polymer cross-linked into every OrthoLite® foam continuously resists microbe growth and provides built-in protection from fungus, bacteria and odor.
