## Hybrid Comfort & Performance Technology

OrthoLite® Hybrid™ is a proprietary formulation that can be used on its own or blended into other OrthoLite® formulations to upgrade the percentage of recycled content. The patented design\* uniquely blends 5% recycled rubber and 15% production waste foam to achieve a minimum of 20% recycled-content—for uncompromised comfort and performance.

### PRODUCT SUMMARY

We're always pushing our innovation further—in how our products perform, how they look, and how they are made. OrthoLite® Hybrid™ is a true game-changing technology, whether it's used on its own or combined with other formulations to up the recycled content. Combining 5% recycled rubber and 15% open-cell waste foam with virgin open-cell foam, it goes the distance and retains all the comfort and performance attributes OrthoLite® is known for and consumers expect using less petroleum and less energy, while adding less to landfills.

### APPLICATION

Ideal for a wide range of applications, OrthoLite® Hybrid™ provides cushioning and performance critical in insole, strobelt and upper applications. The OrthoLite® Hybrid™ formulation creates a cooler, drier environment inside all categories of footwear, so consumers can feel and perform their best.
