Comfort that Floats

OrthoLite® Float™ is a lightweight underfoot technology that softly responds to the unique movement of the foot and quickly rebounds after each step.

PRODUCT SUMMARY

OrthoLite® Float™ is a revolutionary formulation combining both exceptional lightness and impressive high-rebound support. With an impressive resilience rating of over >38, OrthoLite® Float™ offers immediate step-in comfort and a cushioned, floating ride. Its soft, all-day resilience is paired with full breathability, moisture management, and long-lasting performance, ensuring consistent comfort throughout the shoe's lifespan.

APPLICATION

OrthoLite® Float™ offers the uncompromised comfort and performance attributes that OrthoLite is known for. Ideal in a variety of applications, OrthoLite® Float™ can be used within comfort casual, outdoor, athletic, dress, fashion, and all active lifestyle footwear categories. Available in sheets, molded and die cut.

All OrthoLite® open-cell formulations contain 5% recycled rubber content.

Hybrid

ORTHOLITE® HYBRID™
TECHNOLOGY

OrthoLite® Hybrid™ Technology is available in the Seedpearl Hybrid color 12-0703 TPX. Hybrid is a recycled technology that reuses post production waste foam. Waste colors and waste pieces will vary in size, density, hardness and color.

ORTHOLITE® HYBRID™ TECHNOLOGY IS
AVAILABLE IN MOST FORMULATIONS.
