

Customized Comfort That Breathes

OrthoLite® SloMo™ - A first-ever breathable memory foam technology delivering instant step-in comfort and customized fitting, in combination with adaptive pressure relief and optimized airflow with every step.

PRODUCT SUMMARY

OrthoLite® expands its industry-leading Memory Foam Collection, elevating comfort and performance to the next level. Building on the success of OrthoLite® Eco-Impressions™ and Lazy, the introduction of the all-new OrthoLite® SloMo™ formulation broadens the possibilities for premium comfort and innovation in a first-ever lightweight memory foam. Engineered with our proprietary Open-Cell PU technology, this dynamic slow-recovery memory foam delivers superior breathability and personalized responsiveness. OrthoLite® SloMo is precisely tuned, empowering brands to create an unforgettable underfoot experience step-after-step.

APPLICATIONS

SloMo™ can be utilized across all categories and all applications. Perfectly suitable as either a single or dual layer memory foam solution that cradles and supports the foot with incredible feel. Available in both molded and die-cut options, SloMo is also ideal for linings and tongues—giving the entire shoe a 360° custom-fit and feel that breathes and elevates the step-in experience in every type of footwear.
